

AC 1000

Introducing AC 1000 – The compact air curtain solution for Truck Dockings

Welcome to the cutting edge of advanced air curtain technology with the AC 1000, the premium no-heat air curtain meticulously designed to optimize the efficiency and safety at truck dockings. With its state-of-the-art features, AC 1000 ensures superior climate control and enhanced security for your loading docks.

Designed specifically for truck dockings, AC 1000 offers unparalleled performance and versatility. Equipped with our Airstop nozzle featuring knife jet technology, this air curtain efficiently regulates indoor temperatures while effectively blocking outside elements. Whether it's maintaining a consistent temperature, preventing dust and debris ingress, or enhancing safety by reducing the risk of accidents, AC 1000 delivers exceptional results.

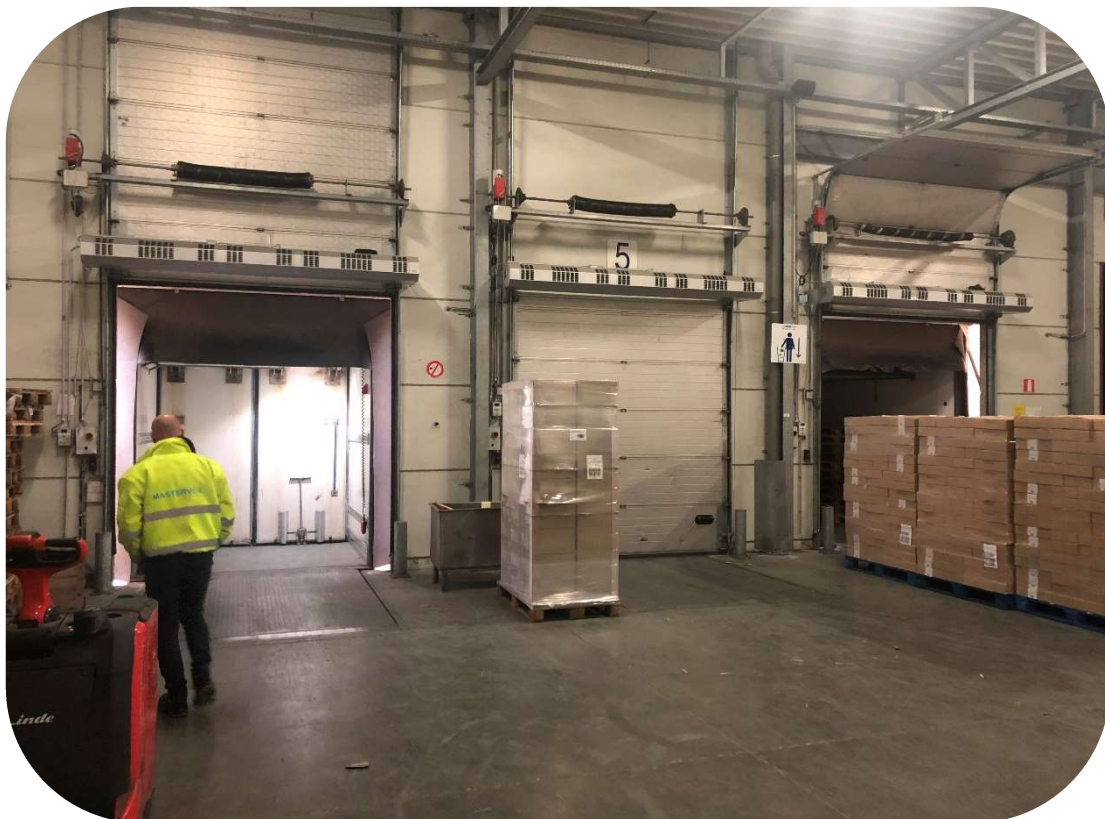

Installation of the AC 1000 is simple and hassle-free, and with several model options available, you can customize the air curtain to suit the unique requirements of your truck docking environment.

Key Features:

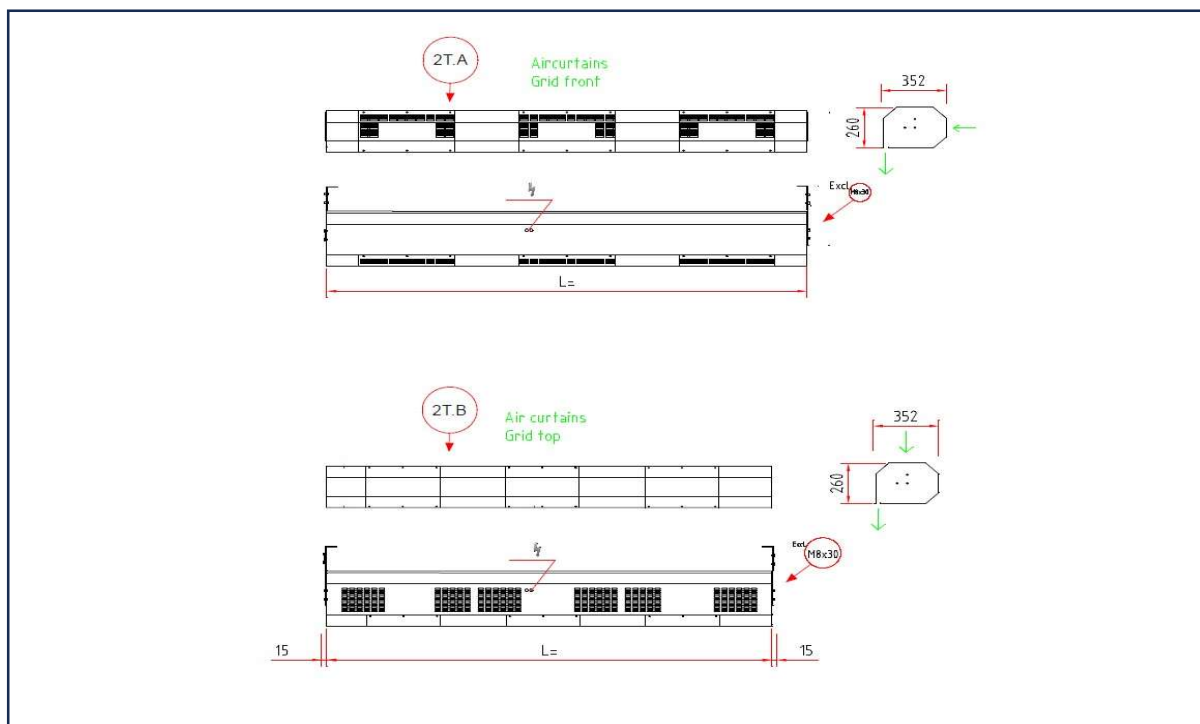

- Tailored for truck dockings to optimize efficiency and safety
- Airstop nozzle with knife jet technology for superior performance
- Easy installation and with multiple model options
- Enhanced climate control and security for loading docks

Choose AC 1000 for unmatched air curtain technology that guarantees optimal performance and safety at truck dockings.

Contact us today to explore customized solutions tailored to your specific needs and take your loading dock operations to new heights!
