

IceDry 1400 AirC

The Munters IceDry 1400 AirC is a stand-alone dehumidifier designed specifically for cold storage and freezer systems. It effectively combats ice and snow buildup, which can create hazardous conditions and increase maintenance needs.

The IceDry 1400 AirC dehumidifies incoming air within cold storage areas, preventing condensation that would otherwise turn into frost and ice. This ensures safer operations, better product quality, and reduced downtime. The advanced AirC400 controller ensures seamless integration and optimal control through an intuitive user interface, multilingual options and Modbus communication.

Highlights

- ✓ 25 % more energy than previous model
- ✓ Advanced AirC400 controller
- ✓ Safeguards product quality
- ✓ Optimizes loading and unloading times
- ✓ Minimizes energy and maintenance costs
- ✓ Reduces cold room defrosting and downtime
- ✓ Promotes safe working conditions
